E-mail: joeytermeulen@gmail.com
Date of birth: 16-02-1989
Nationality: Dutch

Overview

Hello! I am Joey, a 31-year-old frontend web developer from Amsterdam, the Netherlands. In 2017 I discovered coding and after extensive home studies, I officially joined the development industry at the start of 2018. I have since been professionally developing websites, focusing on React.js, Node.js and GraphQl.
With 3 years of working experience, React.js is my main strength - but in my spare time, Unity and C# take over. Coding games is just as fun!

I recently moved back to the Netherlands after living and working in Sweden and Spain for a few years. I'm looking for a fresh new challenge at a company that champions their team spirit as much as their product. I enjoy working with other crafts, collaborating daily with UI/UX, QA and backend developers. I'm always open to feedback and new ideas and can handle stress very well. I am organised, make quick decisions and I can lead a group when I need to.

Job experience

February 2021-May 2021

Zeelo   Carrer de Tànger 86, 08018 Barcelona, Spain

Occupation: Frontend WebDeveloper (fulltime, 40 hours a week)

Job description: Zeelo is a bus sharing company functioning as a SaaS platform. My main focus while working here was on improving and adding features to the internal tools, which are used on a daily basis by operators. The platform is built with React and uses an inhouse UI library created with Styled-Components powered by Storybook.

April 2018 - December 2020

LeoVegas   Luntmakargatan 18, 111 37 Stockholm, Sweden

Occupation: Frontend WebDeveloper (fulltime, 40 hours a week)

Job description: LeoVegas is an online casino provider. My daily job includes developing new features, especially to enhance the game experience for players. I work with React.js, Node.js and GraphQL on a daily basis. Other responsibilities include writing tests for the features we develop, maintain and bug-fix any

feature previously released, and close collaboration between designers and BackEnd developers. In my nearly 3 years at LeoVegas, I have gone from junior to senior within the company. I functioned as interim team-lead for 4 months, where I guided the project from start to finish while coding and managing team members and stakeholders.
